## Saturday June 27 Cable Airport BBQ Fly-IN

*You are invited* to the Inland Empire's first technically advanced flying club. Electronic Key Dispatch, 24/7 Access, On-line Scheduling, and Free WI-FI. Nine (9) wonderful aircraft to choose from. Light Sport, Multi-Engine, Piper, Cessna, and Tail Draggers. Brand new, clean & comfortable Pilots Lounge. Come join us on Sat. 27 JUNE between 1pm & 3pm and let's chuck down some BBQ together, talk about a new vision for the future, and commit aviation in the finest way possible. Foothill Flying Club Welcomes you to Cable Airport. Family Owned and Operated Airport Since 1945.

### GOBOSH 800XP On the Flight Line!

The 800XP has arrived at Foothill Flying Club. The Gobosh 800XP is the fastest and most thrilling Light Sport on the market. It is luxuriously comfortable, has a wonderful glass panel and full-airframe parachute as standard equipment. It is much wider than the 700 model, and has direct nose wheel steering. The 800XP has a range of over 600nm and carries 30 gallons of fuel. The Garmin 496 has XM weather for cross country peace of mind.

75% of LSA renters / owners are private pilots who want to fly something that is more fun than the same old 1970's airplane. We invite you to fly the Gobosh 800XP.

### Cessna 182 On the Flight Line! Great Panel!

Garmin 430 waas, Garmin 496 with XM weather, Garmin 330 Xpndr with Traffic Information Service, KX155 NAV COM, Dual Glide Slopes, auto pilot! Cross Country and IFR.

Dave Franklin's  
**Private Pilot  
&  
Instrument  
Pilot  
Ground Schools**  
Begins September 2009

### "I wanna Fly to OSHKOSH!"

Bob Hadley, Sport Pilot. Share expenses. (714) 310-4549  
Jim Theirl, Student Pilot. Share expenses. (909) 635-5999

Call Tony Settember 909 917 5851  
if you want to get added to the list.

Mt. Sac Students get \$5.00/hr off the 152 N955ER. Donated by Bill Schuessler

**Denise Early  
Private Pilot**

May 14, 2009  
Denise Early smiles above. The skies look much better to all of us now that Denise has passed her Private Certificate. She did all of her training and her check ride in her very own Cessna 150. How cool is that!

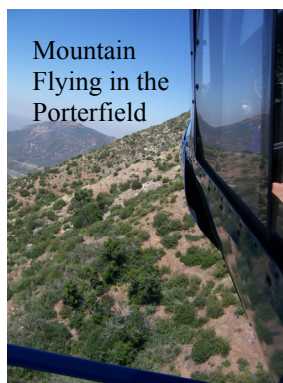

**Chris LeFave makes first of several SOLO tail dragger flights.**

May 09, 2009  
After sooooo many dual practice flights in his 1941 Porterfield, Chris LeFave (top photo) makes his first solo tail wheel landing at KCCB (second photo).

Such a day is hard to beat after dragging around his instructor for so long. To celebrate, Chris took off for El Mirage dry lake for a few Off-Airport landing experiences (photo above on the dry-lake). Too Cool.....

**WELCOME BACK EMMETT HOOLIHAN!**

Cable Airport and Foothill Flying Club would like to welcome back Emmett Hoolihan to the CFI list. Emmett has been off for medical leave, but is now back in the saddle, so to speak. The man moves so fast these days that we could not pin him down for a photo, but those who know him will recognize that steady fast grin.

*Emmett said to say "Thank You" for all the support from his students and friends who have kept his head in the clouds for the last year.*

**Piper Turbo Seneca II  
On the Flight Line**

As promised, multi engine training and cross country rental will now begin with this marvelous aircraft. The panel has a Garmin 430 WAAS, and KX155 NAV Com for the complete IFR experience. Counter rotating propellers make this a safe trainer with no "critical engine." The flight line is complete now with both High Performance, multi-engine and retractable gear aircraft. Welcome to the new Foothill Flying

**Gobosh 800XP  
Light Sport Aircraft**

The Gobosh 800XP comes standard with the full aircraft parachute, Dynon Glass Panel, Garmin GPS. Blow by the competition like they are standing still. Rent the Gobosh 800XP at Foothill Flying Club.
